

Emagine has taken great measures to ensure a clean and comfortable movie-going experience for our guests. The health of our employees and our movie-goers is a top priority for us, and accordingly, that goal was the underpinning in developing our guidelines.

Guests returning to Emagine will notice quite a few strategic measures taken in accordance of CDC, WHO and local health authority guidelines. We have completed a deep cleaning of all of our buildings with CDC approved products. This cleaning regimen will become common practice and be performed regularly and continuously at all Emagine locations. Guests are encouraged to purchase tickets in advance through Emagine's website or app, which will allow for contactless selection of seats and purchase of tickets prior to entering the theatre. Before entering our front doors, there will be signs asking guests to refrain from entering our theatres if they have experienced any symptoms of COVID-19. Emagine is also requesting that all guests respect social distancing guidelines and that all guests wear masks, consistent with state mask and safety regulations, while in our lobbies and restrooms. We will also provide masks for any guests upon request. Our lobbies will have directional signage and graphics to remind guests to remain 6 ft. apart at the box-office, concession stand, self-serve soda stations, restrooms, and queueing lines. Hand sanitizer stations will be available at numerous locations throughout the building. Restrooms will have restrictions on capacity and have signage to remind guests to socially distance while inside.

In addition to re-arranging furniture to respect social distancing in the lobbies, Emagine has also adjusted the auditorium seating to allow for restricted capacities that are mindful of social distancing guidelines. As guests enter the auditoriums to find their seats, there will be an assigned staircase to go up and another staircase designated for those exiting the auditorium. One-way aisle traffic will be encouraged at all times. There will also be increased time between all showings to allow for thorough and intense cleaning between all showtimes. Employees will also clean and disinfect high traffic areas more frequently and exit doors will be propped open to reduce common touchpoints. By visiting Emagine, you voluntarily assume all risks related to exposure to COVID-19.

Emagine has also adopted a Return to Work Action Plan with safety and cleanliness protocols for our teammates that includes the use of masks and gloves while working. All employees will also be required to complete a daily health screening prior to entering the workplace.

We look forward to again serving our guests and welcoming back our teammates!
